Tamarisk

BEST MANAGEMENT PRACTICES
in COLORADO WATERSHEDS

Drs. Scott Nissen & Andrew Norton CSU
Dr. Anna Sher DU, Denver Botanic Garden
Dr. Dan Bean CO Dept. of Agriculture

Tamarisk (*Tamarix spp.*) is one of the most widespread, problematic invasive species in Colorado. This new book offers succinct and illustrated guidance by experts on how to develop management plans, as well as the implementation of chemical, mechanical, biological and integrated control strategies. Also gives an overview of how to plan restoration for treated sites.

Cost: \$10/copy (Does not include shipping costs.)

To Purchase: Payments by purchase order, check or credit card can be accepted. E-mail Dr. Nissen (scott.nissen@colostate.edu) to order or for more information.
